

Instagram Growth Strategy for Alfido Tech

Objective:

The objective of this analysis is to study Instagram post engagement and identify the best posting time, content type, hashtag usage, and engagement improvement strategies for Alfido Tech.

Key Findings:

The analysis showed that posts published at 8:00 AM had the highest average engagement. Thursday was identified as the best-performing posting day in the available dataset. Photo-based content showed slightly stronger engagement compared to other content types. Posts without Instagram filters performed slightly better, suggesting that clean and natural visuals may be more effective. Among hashtags, #delicious showed the highest average engagement.

Recommended Posting Plan:

Alfido Tech should prioritize posting photo-based content around Thursday at 8:00 AM. A weekly content calendar can include educational posts, project showcases, student-focused content, engagement posts, community updates, and weekly learning recaps.

5 Engagement Strategies:

1. Post consistently during the best-performing time window.
2. Use clean, high-quality photo-based content.
3. Add relevant hashtags instead of excessive or unrelated hashtags.
4. Encourage comments using questions and clear call-to-action captions.
5. Track weekly engagement rate and update the content strategy based on performance.

Conclusion:

The analysis provides a starting content strategy for Alfido Tech based on Instagram engagement patterns. Since the dataset has limited timestamp variation, the recommended posting schedule should be tested further with future post data.
